Challenge for Educators Today

Developing critical thinkers is one of higher education's most important goals. More than 99% of faculty say it is essential to student success. Yet the assessments that best reveal student reasoning often require the most time to grade. As AI changes how students learn and complete assignments, understanding cannot be measured by answers alone. Instructors need a faster, more scalable way to evaluate how students think.

How it Works

- 1. Upload Content-** Instructors upload learning objectives, exams, student responses, or written assignments to generate assessments.
- 2. AI Evaluates-** AI assesses short-answer responses, essays, evaluates entire classes at once, and applies consistent grading criteria across every submission.
- 3. Deliver Instant Feedback-** Instructors can track performance, identify learning gaps, and export results.

What EvaloRix Can Do

- Generate and grade exams
- Grade papers
- Bulk evaluations
- Analyze results

Success Stories

"EvaloRix helped me create a meaningful exam for my undergraduate students, aligning content with learning goals. Students engaged more deeply and even asked for additional practice quizzes."

-Dr. J.M., Professor, Florida Atlantic University

"For my online MBA Global Strategy course, EvaloRix made grading fast and detailed, with clear explanations behind each score."

-Dr. K.C., Professor, Florida Atlantic University

"All written assignments in my MBA Venture Creation course were graded with the help of EvaloRix. The feedback was detailed and improved student learning."

-Dr. G.C., Professor, Florida Atlantic University
